

CALL FOR PRESENTERS

Risk Scoring Algorithms and Their Unintended Biases

Calling all practitioners, researchers, and government employees.

Algorithmic insider risk scoring tools are rapidly gaining traction across government and industry, promising enhanced security and decision-making. Yet, these systems often operate as black boxes, raising critical questions about fairness, auditability, and unintended bias.

At **The Insider Threat Summit's 2025 Nook**, we want to explore how risk scoring algorithms are designed, deployed, and evaluated—and how we can ensure they support, rather than undermine, trust and equity.

We are seeking presentations that include, but are not limited to, the following topics:

- **Auditability and Fairness:** How can insider risk scoring models be assessed and improved for bias, discrimination, or disparate impact?
- **Lessons from Standards Frameworks:** What can FedRAMP, AICPA Trust Principles, and similar frameworks teach us about building and assessing trustworthy algorithms?
- **Explainability in Practice:** How can we design dashboards and models that help end-users understand why someone was flagged—without oversimplifying or obscuring risk signals?

SUBMISSION GUIDELINES

- Abstracts should be no more than 300 words.
- Include the details of the presenter(s).
 - Name, organization, title, email address.
- Presenters will be notified on a rolling basis.
- ITS Nook will not accept abstracts that serve as strictly promotional material for your company.
- **Submissions are open until September 30, 2025.**

HOW TO SUBMIT

Please send your abstract and presenter information directly to our Event Coordinator, Lauren McCabe, at lauren.mccabe@advancedonion.com.

14 NOVEMBER 2025

Bayonet and Black Horse
1 McClure Way,
Seaside, CA 93955

SESSION FORMATS

Long-Form General Presentation

This is an in-depth presentation on the topic.

Short-Form General Presentation

This is a " cursory glance" presentation on the topic.

Panel Discussion

This is a cooperative, conversational presentation with other speakers.

Note: Government Speakers speak for FREE. Industry Speakers require a company sponsorship.
